

RAY OF HOPE IS FOR ALL

A LITTLE BIT OF A LANGUAGE, A LOT OF HOPE

The importance of English in a career cannot be overstated. Having English as a second language is one of the most significant steps in a career in India. KIRAN has been providing skills training to youth with disabilities in vocations such as Art & Craft, Food Processing, Carpentry and tailoring.

KIRAN has decided to incorporate soft skills into its vocational skills training program. We have started English language classes for our vocational skills trainees as part of this quest. They will benefit from adding the English language as a skill to their resume.

The KIRAN vocation skills program will continue to be improved so that youth with disabilities have better opportunities to earn a living.

A LITTLE WISH, A LOT OF HOPE

In rural Varanasi and Mirzapur, KIRAN is implementing ATMANIRBHAR with the support of IM Sweden. This program provides vocational training for youth with disabilities and from the marginalized.

These youth are paving the way to a dignified livelihood with technical skills training in trades such as Mobile Repairing, Blood Collection, Worm compost, Spice Making, Tailoring, Beautician.

To complement their technical skills, a soft skill training was organised to build self confidence in trainees.

Prahalad is a young man who has been in a wheelchair since he was born. He never allows his situation to hold him back and is always working hard to use his athletic abilities to the best of his abilities.

Prahalad received much needed support from KIRAN society to pursue his dream of representing India in Para Games.

He is now preparing for national para games which he had qualified after winning at state level games.

A LITTLE BADMINTON, A LOT OF HOPE

Donate Now

KIRAN provides appliances such as Calipers, Prosthesis, Splint and Customize Wheelchair to children with disabilities from marginalized sections.

Every year on an average KIRAN helps about 1000 children, in 2020-21 KIRAN delivered 529 appliances and 62 aids.

The average cost to provide calipers to one child is INR 5000. Donate now to help KIRAN provide Calipers to children with disabilities from marginalized communities.
